A Reflection on Mathematicians

Mikayla Lin

Description

This puzzle is in the style of a puzzle hunt, in which information is given without instructions. The goal of the puzzle solver is to figure out how to use the information to extract a final string.

It seems as if strange symbols have infiltrated your math history test. And with a weird grid in the back too. It reminds you of a crossword, but you suspect it's not so straightforward. Perhaps this grid calls for a change in perspective.

The solution is on page 19.

Puzzle

1. Greek mathematician known for the principle of buoyancy
   - $\Uparrow$ Archimedes
   - $\Downarrow$ Mobius
   - $\Leftarrow$ Lagrange
   - $\Rightarrow$ Noether
2. Mathematician famous for his work on topology with a one-sided strip named after him
   - $\Uparrow$ Turing
   - $\Downarrow$ Mobius
   - $\Leftarrow$ Poincare
   - $\Rightarrow$ Nash
3. Italian mathematician whose sequence is widely used in nature and art
   - $\Uparrow$ Fibonacci
   - $\Downarrow$ Leibniz
   - $\Leftarrow$ Cantor
   - $\Rightarrow$ Fermat
4. German mathematician and physicist who made significant contributions to abstract algebra
   - $\Uparrow$ Germain

- $\Downarrow$ Hawking
- $\Leftarrow$ Noether
- $\Rightarrow$ Einstein

5. French mathematician who laid the foundations of algebraic topology
   - $\Uparrow$ Pythagoras
   - $\Downarrow$ Ramanujan
   - $\Leftarrow$ Hawking
   - $\Rightarrow$ Poincare
6. Nobel Prize-winning mathematician known for his work in game theory
   - $\Uparrow$ Ramanujan
   - $\Downarrow$ Descartes
   - $\Leftarrow$ Galois
   - $\Rightarrow$ Nash
7. Father of modern computer science and codebreaker during World War II
   - $\Uparrow$ Turing
   - $\Downarrow$ Pythagoras
   - $\Leftarrow$ Lagrange
   - $\Rightarrow$ Einstein
8. German philosopher and mathematician who co-invented calculus
   - $\Uparrow$ Riemann
   - $\Downarrow$ Ramanujan
   - $\Leftarrow$ Leibniz
   - $\Rightarrow$ Galois
9. Mathematician who introduced set theory and the concept of infinity
   - $\Uparrow$ Descartes
   - $\Downarrow$ Ramanujan
   - $\Leftarrow$ Cantor
   - $\Rightarrow$ Lagrange
10. An ancient Greek mathematician credited with a theorem about right-angled triangles
    - $\Uparrow$ Galois
    - $\Downarrow$ Hawking
    - $\Leftarrow$ Pythagoras
    - $\Rightarrow$ Germain
