Sequences Puzzle

Liz Burnell

Each of the sequences below follows a pattern which can be numeric, linguistic, or encoded. For example, sequence $1, 4, 9, 16, 25, _____$ would continue with 36 as the rule is squares of natural numbers $1, 2, 3, 4, 5$, and so on. Below, you need to recognize the pattern and fill in the blank appropriately.

Some of the sequences below are straightforward, while others may require you to look for less obvious patterns, so use your imagination!

1. 1, 2, 4, 8, _____
2. 3, 4, 6, 8, 12, 14, 18, 20, 24, 30, 32, 38, 42, 44, _____
3. M, T, W, T, F, _____
4. J, F, M, A, M, J, J, A, S, O, N, _____
5. 2, 1, 3, 4, 7, 11, _____
6. $--$, $.-$, $-$, _____
7. 3, 1, 4, 1, 5, 9, 2, 6, 5, 3, 5, _____
8. P, r, _ S, c, _, _ n, t, _, _ _, t, q, _, _ S, _, p, _, _, n, t, _, _
9. 2, 7, 1, 8, 2, 8, 1, 8, 2, _____
10. -1, 2, 7, 14, 23, 34, 47, _____
11. 0, 1, 2, 3, 4, 5, 6, 0, 1, 2, 3, 4, 5, 6, _____
12. 1, 1, 1, 2, 1, 1, 3, 3, 1, 1, 4, 6, 4, 1, 1, 5, _____
13. 1, i, -1, _____
14. 1, 11, 21, 1211, 111221, _____
15. 4, 3, 3, 5, 4, 4, 3, 5, 5, _____
16. 1, 7, 19, 37, 61, 91, 127, 169, 217, 271, 331, _____
17. 0, 1, 9, 36, 100, 225, 441, 784, _____
18. 1, 2, 2, 3, 3, 4, 4, 4, 5, 5, 5, 6, 6, 6, 6, 7, 7, 7, 7, 8, 8, 8, 8, 9, 9, 9, 9, 9, 10, 10, 10, 10, 10, 11, 11, 11, 11, 11, 12, 12, 12, 12, 12, _____

The solution is on page 4.
