

Hidoku Queens

Serena Chen

1 Rules

This puzzle is a combination of Hidoku and Queens (aka Star Battle). There are a total of three parts to this puzzle that will lead you to a final word.

- **Part One:** This part is a standard game of Hidoku. Given the partially filled 8x8 grid, each number from 1-64 must appear exactly once such that consecutive numbers can be connected horizontally, vertically, or diagonally. (The different colored sections are for part two, ignore them for now). There is one unique solution!
- **Part Two:** The second part will be a game of Queens. Given the different colored sections on the grid, each section, row, and column must contain one crown. Two crowns also cannot touch vertically, horizontally, or diagonally. Circle each number that will have a crown placed in its box.
- **Part Three:** Each crown in part two should correspond to a number. Each number should correspond to a letter in the alphabet. (Hint: 1 = A, 2 = B, 3 = C ... 27 = A, 28 = B, etc.) In the end, put together the letters to reveal the secret word!

2 Puzzle

Secret Word: _ _ _ _ _

4		1	10			40	
	5			37		20	
		13		36			
7		15				46	
32				23	49	47	
							64
	30	54		56		60	
28					57		62

The solution is on page .
