

Verbal Arithmetic

Nathan Kuo

A math teacher and an English teacher walk into a bar. As they chat about the weather and New York sports teams, they accidentally exchange homework. When the math teacher's students get their homework, they notice that there are far too many letters on the paper:

Problem 1:

$$\begin{array}{r} \text{ABC} \\ \times \quad \text{DE} \\ \hline \text{HGBC} \end{array}$$

A, B, C, D, E, H, G are non-zero numbers and less than 8.

Problem 2:

$$\begin{array}{r} \text{BOB} \\ \times \quad \text{BOB} \\ \hline \text{MARLEY} \end{array}$$

B, O, A, R, L, E, Y are less than or equal to 9.

Problem 3:

$$\begin{array}{r} \text{AA} \\ \times \quad \text{AA} \\ \hline \text{ABA} \end{array}$$

A, B are non-zero numbers less than 3.

Problem 4:

$$\text{HI} \div \text{O} = \text{I}$$

H, I, O, are non-zero numbers less than 7.

Problem 5:

$$AYE \div NAY = A$$

A, Y, E, N are non-zero numbers.

Problem 6:

$$\begin{array}{r} \text{abc} \\ + \text{bc} \\ \hline \text{acd} \end{array}$$

a, b, c, d are non-zero numbers less than 7.
