Telephone: (212) 312-4800 Facsimile: (212) 587-3874

Mathematics Department Course Contract

- Attendance:** Students are expected to be in class unless it is unavoidable. It is each student's responsibility to get notes and homework from any missed classes. Students are responsible for bringing in a Stuyvesant absence form immediately upon their return to class. Please refer to the school's policies (link below) on what constitutes an "excused absence."
- Late/Missing Assignments:** Students with an excused absence may submit late assignments on the day they return to school. If a student has an excused absence for multiple days, they will be given the same number of days to submit any work assigned during their absence. Students with unexcused absences may submit late work at the discretion of the teacher. Please see the school's homework policy (link below) for more information.
- Tutoring:** Please take advantage of tutoring opportunities at Stuyvesant. Bring to tutoring all materials needed for topic review, including class notes, worksheets, past tests, and any other relevant materials.
- Calculator:** All Regents and AP exams for mathematics require the use of a graphing calculator. Students should come to class everyday with a graphing calculator. We recommend any of the TI-84 calculators, as that is the model with which most teachers are familiar.
- Report Card Grades:** Grades will be determined according to student performance in the following categories: Summative Assessments, Homework, and Classwork. There will be a minimum of two full-period assessments (or the equivalent) per marking period based on the lessons, classwork, and homework. As per school policy, these assessments must be announced *at least* one week before the test date. For each marking period, students' grades will be determined according to the table below:

	Marking Period 1	Marking Period 2	Marking Period 3	Marking Period 3 (Geometry only)
Summative Assessments	70%	65%	50%	50%
Homework	15%	15%	15%	15%
Classwork	15%	15%	15%	15%
Midterm Exam		5%	5%	
Uniform Final Exam			15%	20%

For those courses which administer neither a midterm exam nor a uniform final exam, grades for all three marking periods will follow the marking period 1 breakdown. For geometry courses, grades in marking periods 1 and 2 will follow the marking period 1; marking period 3 grades will be calculated as shown in the table above.

All core classes (Geometry, Algebra 2, and AP Pre-Calculus) will take a uniform final exam during the January Regents period. ***Please ensure you are present during the January Regents week to take your uniform final on the specified date.***

- School Policies:** Stuyvesant's students are expected to adhere to all school-wide policies and expectations. Please review the school policies at the following link: [Stuyvesant Academic Policies SY24-25](#).

Note: Teachers may provide additional information regarding expectations for their own classes.
